Frontend Developer with 3.5+ years of experience building responsive, scalable, and user-focused web applications using **React.js, Angular, Vue.js, JavaScript, and TypeScript**. Experienced in developing and maintaining production-grade applications, reusable UI components, REST API integrations, and responsive interfaces across desktop, tablet, and mobile devices.

Currently working at **Tech Integrity Services**, contributing to a **restaurant management product ecosystem** that includes **POS systems, restaurant management dashboards, and customer-facing web applications**. Experienced in translating business requirements into reliable frontend solutions, optimizing UI performance, integrating APIs, and maintaining reusable and scalable code.

Strong understanding of modern frontend development practices, Git-based workflows, component-driven development, responsive design, and collaboration with backend and cross-functional teams.

Education

Higher Secondary Education – GSHSEB <i>National Highschool - Jamnagar</i>	Jamnagar, Gujarat <i>Jun. 2018 – May 2020</i>
Bachelor of Computer Application, Saurashtra University <i>SVET College, Jamnagar</i>	Jamnagar, Gujarat <i>Jun. 2020 – May 2023</i>

Skills

Languages: JavaScript, TypeScript, HTML5, CSS3 Frontend: React.js, Angular, Vue.js, Nuxt.js UI & Styling: Material UI, Tailwind CSS, Bootstrap API & Data: REST APIs, Axios Version Control: Git, GitHub/GitLab Development Tools: VS Code, Postman, JIRA, ClickUp Core Concepts: Responsive Design, Reusable Components, API Integration, Cross-Browser Compatibility

Experience

Frontend Developer <i>Prism Technical Services</i> - Developed and maintained responsive web applications using React.js, Angular, JavaScript, HTML, CSS, Bootstrap, and Material UI. - Contributed to multiple ERP and business-management applications, working on frontend architecture, reusable components, responsive layouts, and API integrations. - Implemented reusable UI components and standardized design patterns, improving consistency and maintainability across applications. - Integrated frontend applications with backend REST APIs, handling data presentation, user interactions, validation, and application workflows. - Worked closely with backend developers and stakeholders to understand requirements, troubleshoot issues, and deliver production-ready features.	January 2023 – March 2025
Frontend Developer <i>Tech Integrity Services</i> - Developed and maintained production-grade restaurant management applications using modern frontend technologies, contributing to multiple modules across the product ecosystem. - Worked extensively with Vue.js for 1.5+ years, developing reusable components, responsive interfaces, business workflows, and interactive application features.	April 2025 - Present

- Contributed to a **Restaurant POS (Point of Sale) system**, implementing user interfaces and workflows required for day-to-day restaurant operations.
- Contributing to the design system by implementing reusable components and standardised design patterns, resulting in increased consistency across the product.
- Developed and enhanced **restaurant management dashboards**, enabling restaurant staff and administrators to manage operational data through intuitive and responsive interfaces.
- Used **Git** for source control and collaborative development, including feature development, code changes, and maintaining project branches.

Notable Projects for company

Tms - Transport Management System | Angular, Django, SQL Server

tms.prismtechs.in

- In this project, which I developed using Angular and APIs in Django, I have learned many new things about Angular & Bootstrap CSS and Material UI .

Awakenmindmaps | Angular, Django, MySQL workbench

awakenmindmaps.com

- On-demand Counselling booking website for the Client. Implemented the website using Angular and Django with REST API . Design the UI according to the customer. Deployed for all screen devices.
- AwakenMindMaps which is basically based on Book therapy sessions with counsellor , where I contributed my best efforts to the frontend development

Vekaria-ERP | React, Django, MySQL workbench

vekaria-erp.prismtechs.in

- Using ReactJS, Bootstrap CSS, and Material-UI for frontend development, I contributed to the Vekaria-ERP project.

Restaurant Management Platform | Vue.js, TypeScript, JavaScript, PHP Laravel

estore.wiyak.shop

- A product ecosystem designed to support restaurant operations through multiple connected web applications.
 - *Restaurant POS*
 - Developed frontend functionality for a restaurant Point of Sale system, supporting day-to-day restaurant operations and order-related workflows.
 - Built responsive and reusable Vue.js components for efficient interaction and smooth application workflows.
 - Integrated frontend screens with backend APIs for real-time data handling and business operations.
 - *Restaurant Management Dashboard*
 - Developed dashboard interfaces for restaurant staff and administrators to manage operational information and workflows.
 - Implemented reusable components, forms, tables, filters, and interactive UI elements to improve usability.
 - Worked on API integration and frontend data management for different restaurant management modules.
 - *Customer Web Application*
 - Developed customer-facing web interfaces with a focus on responsive design, usability, and seamless navigation.
 - Implemented reusable frontend components and integrated APIs to provide dynamic application content.
 - Ensured consistent user experience across desktop, tablet, and mobile screen sizes.
